

AN OUTSTANDING GUEST

BRIAN GILL

Computer Scientist,
Entrepreneur and
Angel Investor

BIO

Brian is a computer scientist, entrepreneur and angel investor. Brian currently serves as Chairman of Gillware, which provides cyber risk assessments, data recovery, incident response and digital forensics services. He is a co-founder of Phoenix Nuclear Labs and served on PNL's board from inception to when it decided to spin-off SHINE Medical Technologies. Those two companies have raised over 100 million dollars of venture capital and employ hundreds of people in Wisconsin.

TOPICS TO DISCUSS

- IT Disaster Planning
- Practical IT security for SMB
- Start-Ups
- Angel Investing

QUESTIONS TO ASK

- What is a ransomware event and why do I keep hearing about them?
- What does an incident response company do exactly?
- How is it that government agencies are not having more success catching these computer criminals?
- What are a couple actionable tips that small businesses can do right now to improve their IT security?
